

ADITYA NATH SUMAN

+91 8209246645 | adityanathsuman15@gmail.com | [LinkedIn](#) | [Github](#) | [My Portfolio](#)

Results-driven **Lead Engineer** with 5+ years of experience in architecting scalable, high-performance web applications. Expert in the **React ecosystem, Next.js, and Micro-frontend architecture**, with a proven track record of optimizing Core Web Vitals for high-traffic platforms like **shiksha.com**. Specialized in reducing system latency, spearheading large-scale TypeScript migrations, and integrating AI to enhance developer workflows.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, GraphQL (Apollo/React Query), Zustand, Redux, SASS, Tailwind CSS
- **Backend & DB:** Node.js (NestJS/Express), PostgreSQL, MongoDB, REST APIs
- **Architecture:** Micro-frontends (Module Federation), Event-Driven Microservices, Monorepos (TurboRepo), BFF Pattern, System Design (HLD/LLD)
- **Tools & DevOps:** Git, Jenkins, Webpack, Jest, Mocha, Agile/Scrum.

PROFESSIONAL EXPERIENCE

InfoEdge | Lead Engineer (Frontend)

Noida, UP | Feb 2025 – Present

- **Core Web Vitals Optimization:** Spearheaded performance initiatives for **shiksha.com**, improving **Interaction to Next Paint (INP)** scores by **5%** across a massive URL bucket of **20,000+ pages**.
- **Runtime Efficiency:** Reduced initial load times for low-end devices by architecting a strategy for CSS bundle minimization and intelligent lazy-loading
- **AI Strategy:** Leading the team's **GenAI adoption roadmap**, identifying high-impact use cases to automate repetitive coding tasks and improve overall developer experience.
- **Tech Stack:** React.js, Node.js, Redux, CSS Modules, SEO Optimization.

Publicis Sapient | Associate SDE-2

Gurugram, Haryana | Oct 2022 – Feb 2025

- **Platform Transformation:** Engineered performance enhancements for a Retail Banking Platform, achieving a **70% reduction in load time** (from 10s to <3s), significantly boosting user retention.
- **Legacy Modernization:** Led the end-to-end **TypeScript migration** of the stitching layer and micro-frontends, reducing production error rates and improving maintainability for a global engineering team.
- **Engineering Excellence:** Managed complex state and data flows using **Zustand and GraphQL** within a **TurboRepo** monorepo environment.

Publicis Sapient | Associate SDE-1

Remote | May 2021 – Oct 2022

- **Micro-Frontend Architecture:** Implemented **Module Federation** to integrate multiple Next.js micro-frontends, increasing the modularity and scalability of the banking portal.
- **Product Development:** Designed and launched the "Advice For Everyone" (A4E) portal, enhancing client engagement via financial service digitization.
- **Data Layer Optimization:** Integrated Apollo Client and React Query to streamline GraphQL data retrieval, improving UI responsiveness.

NOTABLE PROJECTS & CONTRIBUTIONS

- **Open Source: dynamic-module-federation (NPM):** Published a package to simplify the integration of Micro-frontends (MFE) across diverse project architectures.
- **Mini Search Engine:** Developed an indexing engine utilizing the simplified **PageRank Algorithm** to create searchable offline website copies (Python, REST APIs).
- **Weather Forecast System:** Built a full-stack app utilizing **BFF (Backend-for-Frontend) architecture** and the **Strategy Design Pattern** for optimized data suggestions.

EDUCATION

National Institute of Technology Hamirpur | Himachal Pradesh India
BTech in Computer Science and Engineering

May 2021
GPA: 7.83 / 10
